

Sugar Maple

Sugar Maple is also commonly known as Hard Maple, Rock Maple, Black Maple, or Curly Maple. The wood is one of the most valuable hardwoods in Canada. Sugar maple is also highly valued for its hard, fine-grained wood, which is used for making furniture, musical instruments, veneer, cutting blocks, flooring, rolling pins and more. The wood also shows up as cabinets, countertops, cutting boards, and butcher block. Maple is considered a relatively stable wood once it has been dried. It doesn't expand and contract easily as do other hardwoods. It finishes very well, is easy to machine, and hand planes beautifully.

Grading System

SPF Lumber is graded in the same way in all parts of Canada, according to the rules written by the National Lumber Grades Authority (NLGA).
